

Care & Cleaning Instructions

Your new friend will join you on many adventures and may become a bit dirty. To clean:

- 1) Remove all loose dirt or vacuum gently.
- 2) Use a warm **white cloth** and a small drop of mild laundry detergent to gently rub the stain. Rinse out cloth and wash your animal again to remove all the soap from its fur. **DO NOT PLACE IN A WASHING MACHINE**, even on gentle cycle.
- 3) If stains cannot be removed, hand wash very gently in warm water with a small drop of mild laundry detergent. **DO NOT USE HOT WATER**. Rinse thoroughly in clean cold water so that all soap is removed. Gently wring out the arms and legs and softly squeeze the body. Wrap your animal in a clean **white towel** and squeeze firmly to remove all the excess water. Air dry in a warm room and **OUT OF DIRECT SUNLIGHT**. Never place your animal in an electric or gas dryer as this may cause damage to its fur. You may use a hair dryer on low heat/speed to fluff dry your animal.

We cannot guarantee that all dirt or stains can be removed or that some detergents may not damage your friend's coat. Remember to treat your fluffy friend with care and gentle cleaning so you can have a lifetime of fun together!
